Professional Summary

Computer Science and Engineering graduate with experience in full-stack development using NestJS, Next.js, React, TypeScript, and Node.js. Published conference author at ICCIT 2025 and co-founder of a software startup. Interested in software engineering, full-stack development, and building scalable applications.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, PHP, C/C++
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, SSR, App Router
Backend: NestJS, Express.js, Node.js, Laravel, REST APIs, JWT Authentication, RBAC
Databases: PostgreSQL, MySQL, MongoDB, Firebase Firestore, TypeORM
Testing: API Testing (Postman), Debugging backend services, Error handling, Unit testing
Tools: Git, GitHub, Docker, Linux, Postman, Figma, Agile/Scrum, CI/CD

Education

American International University – Bangladesh (AIUB) 2022 – 2026
B.Sc. in Computer Science & Engineering CGPA: 3.79 / 4.00

Experience

Co-Founder & Lead Software Developer 2023 – Present
Algo Tech IT Dhaka, Bangladesh

- Co-founded a software and cybersecurity startup delivering web applications and digital solutions to clients.
- Led full-stack development using React, Next.js, Node.js, NestJS, and PHP while managing project planning and client communication.

Thesis

Developing a Computer Vision Model Using AI for Detecting Deepfake Misinformation. 2025 – 2026

- Designed a hybrid deep learning architecture combining EfficientNet and Vision Transformer (ViT) with progressive layer unfreezing for binary deepfake classification on a large-scale dataset.

Projects

AI Interview Preparation Platform *NestJS, Next.js, PostgreSQL, Redis* 2025 – Present

- Built a full-stack AI interview preparation platform featuring JWT authentication, RBAC, Redis caching, background job processing, and Gemini API integration.

Library Management System *NestJS, Next.js, PostgreSQL* 2025

- Developed a role-based library management solution supporting inventory tracking, member management, borrowing workflows, and administrative dashboards.

Chatify Social Platform *Flutter, Firebase, Cloudinary* **Live Demo (Chatify)** 2024 – Present

- Designed, developed, tested, deployed, and maintained a cross-platform social media application with real-time messaging, Firebase authentication, media uploads, and responsive UI. Full functional app available.

Publications

- **Comparative Analysis with Hybrid Model Design for Deep Learning Approaches in Detecting Plant Diseases**, ICCIT 2025.
- **Design and Analysis of a GSM and GPS-Based Smart Stick for Visually Challenged Persons**, COMPAS 2025.
